A MESSAGE FROM OUR CEO

As the largest Canadian owned and operated window and door manufacturer, All Weather Windows is committed to you, our customer. What matters to you, matters to us. That is our promise.

And our promise is not just words. At All Weather Windows, we truly listen to our customers. Our team of experts is constantly working to understand what our customers value and consistently delivering on that value. Our award-winning line of products are made for you with care, by employees dedicated to providing the best possible product and the best possible customer experience.

Designed with you and your unique needs in mind, our products and services are innovative, industry-leading, energy efficient, NAFS tested and certified. With our continuous investment in research and development and our focus on operational excellence, we offer you, our customers, a guarantee that no other Canadian company can.

Trusted. Valued. Effortless. That is the All Weather Windows experience.

RICHARD SCOTT
President & CEO

FOUR DECADES OF GIVING

At All Weather Windows, our philosophy for giving back is to improve the lives of families, one family at a time. Over the years, we have been fortunate to work with many incredible partners to help achieve our vision and assist those in need the best we can.

Our focus is to work with our partners to build sustainable and long-term support for those in need. We strive to empower long term success by providing assistance to students in industry related studies; helping organizations who support children and families; working with organizations that focus on mental health and provide opportunities for individuals with disabilities; and by devoting resources in the construction of shelter for those in need. We are proud to partner with organizations such as Habitat for Humanity, U School and Camp Nakamun.
WE LEAD THE SCENE FOR KEEPING IT GREEN

Canadian weather may have its ups and downs, but our environment needs to be respected and preserved. That’s why we promote sustainable initiatives by partnering with key environmental organizations and building councils like the Canada Green Building Council, Canadian Home Builders’ Associations, Canadian Standards Association, NRCan and Built Green Canada.

Our accolades include ENERGY STAR® Manufacturer of the year 4 of the last 7 years and the ENERGY STAR® Sustained Excellence award in 2018 for our continuous commitment to energy savings.

PROUDLY CANADIAN

Founded in 1978 in Edmonton, Alberta, All Weather Windows is Canada’s largest privately owned window and door manufacturer. With three manufacturing facilities, seven customer solution centres and close to 800 dealers, we proudly serve our partners and customers across Western Canada.

Specializing in beautifully crafted windows and doors, our energy-efficient, sustainable and weather-resistant solutions are built for the unique needs of Canadian homeowners, builders, dealers and contractors. We are also proud to be a Platinum member of Canada’s Best Managed Companies program, having received the award 11 years in a row.
Choosing your windows can be confusing and difficult. We have made it easier by creating three product categories that are based specifically on your needs and how you shop: Apex, Horizon and Terrain.

**Apex** series windows offers premium solutions, peak performance and the widest range of customizable options to choose from, bringing both style and comfort to any home.

**Horizon** series is our mid-range offering. It has less options than our Apex series but still enough choice for those who are seeking value for their money.

**Terrain** series makes performance affordable. It has the fewest available options and offers All Weather Windows quality at an affordable price.

the energy-efficiency experts

All Weather Windows prides itself on being an industry leader when it comes to manufacturing energy-efficient, high-performance windows and doors.

This includes ensuring that our products meet and exceed local and national building codes as well as stringent energy-efficiency standards. We offer a full range of NAFS (AAMA/WDMA/CSA 101/I.S.2/A440, North American Fenstration Standard) and NFRC Certified windows and doors, ensuring the products you choose are tailored to your geographic location and conditions while providing maximum value and comfort for your home.

For more information on NAFS ratings and standards, please see page 10 of this catalogue or speak to an All Weather Windows representative.

For energy-efficient glass performance ratings and technology, see page 18.

GREEN REBATES

Homeowners who replace their windows and doors with new ENERGY STAR® certified products may be eligible for rebates. To find out what rebates are currently being offered, visit us at allweatherwindows.com
WE KNOW CANADIAN WEATHER

Extreme weather is what separates good windows and doors from bad ones. As a company born and raised in Canada, we know what it takes to make products that stand up to our extraordinary seasons. From heavy west coast rain to unforgiving blizzards on the prairies and the bitter cold of the north, our doors and windows have been rigorously tested for every climate in every possible weather.

From multiple insulated air chambers and welded corners on our PVC windows, to dual and triple pane glass with Low-E coatings, we can help create a custom product package that exactly matches your needs.

OPTIONS FOR INSULATED CONCRETE FORM (ICF)

With the desire for increased energy-efficiency and Net Zero homes on the rise, ICF construction is more popular than ever. ICF homes are built using high-density foam blocks which are then filled with concrete. The outcome is increased energy-efficiency and overall insulation value (R-Value) of your home.

All Weather Windows offers products and options to maximize the benefits of ICF construction. These include high-efficiency triple pane glass with multiple Low-E coatings, glass that is recessed towards the interior of the home and increased jamb depths to accommodate ICF wall thickness.

ENERGY STAR

Research from Natural Resources Canada indicates that because of the Canadian climate, we spend far more money each year on heating than we do on cooling our homes — adding up to a lot of wasted money.

Luckily, installing ENERGY STAR® certified windows can put a stop to this by significantly cutting energy consumption. It can also save three quarters of a tonne of greenhouse gas emissions annually. That’s equivalent to the carbon offset of planting 80 trees. It’s also why our windows are built to the highest energy efficient standards, consistently earning us ENERGY STAR® awards year after year.
what is NAFS?

The North American Fenestration Standard (NAFS) is designed to combine the window and door testing and ratings process into a harmonized North American Standard. It has been incorporated into the National Building Code of Canada and implemented across Canadian provinces.

NAFS Certification requires stringent standards be met for:

- Air tightness
- Water penetration resistance
- Structural performance under wind loads
- Forced entry resistance

**PERFORMANCE GRADE & CLASS**

Ratings are based on a combination of a product’s structural properties and its ability to resist water. As a result, a single numeric rating is assigned to each product. This rating is called the **PERFORMANCE GRADE (PG).**

NAFS has also categorized the application of fenestration products into four groups. Each of these groups is called a **PERFORMANCE CLASS.** Each class requires products that meet a minimum performance grade.

The performance classes and applicable minimum performance grades are:

- **R:** Residential (one and two family) - minimum PG15
- **LC:** Light Commercial (low rise and multi-family dwellings) - minimum PG25
- **CW:** Commercial Window (low rise and multi-family dwellings, higher loads and larger sizes) - minimum PG30
- **AW:** Architectural Window (mid to high rise buildings, high exposure conditions) - minimum PG40

To help you determine NAFS requirements for your region, please visit [www.fenestrationcanada.ca/calculator](http://www.fenestrationcanada.ca/calculator)
All Weather Windows is proud to be one of the first manufacturers in North America to offer the groundbreaking technology of V-weld as part of our Apex window series. No other window offers such exceptional performance in keeping the outside elements from seeping into a home – virtually eliminating air and water leaks.

**V-WELD IS MORE THAN JUST A FANCY SOUNDING NAME**

Conventional windows use mechanical mullions joined with gaskets and silicone, which contract and expand with temperature differences. This can lead to separation between joints, causing air and water leaks. To eliminate this, V-weld Apex windows are fusion-welded together leaving no gaps, cracks, spaces, slits or any other synonyms that water can seep through. This manufacturing process provides superior frame integrity and ensures better performance than conventional combination windows in water and air tests.

**V-WELD WINDOW TECHNOLOGY**

Fusion welded combination window without the use of screws

**TRADITIONAL WINDOW TECHNOLOGY**

Combination window is joined together with screws

V-weld is available on Apex Alloy 9950 & Apex 9100 series windows.
choose your frame material

New windows increase comfort and add a touch of beauty and elegance to your home, while helping you save on energy bills. They can also add tremendous curb appeal, increasing the resale value.

Choosing the right windows for your home shouldn’t feel overwhelming. To help you choose the perfect windows that deliver the appearance and performance you want, start by selecting the exterior finish for your PVC windows. Each type of colour application offers a specific look, benefits and options.

1. PVC
   Our Polyvinyl Chloride (PVC) windows are energy efficient, durable, and resistant to moisture and corrosion.
   Frames also reduce heat loss, while insulating sound—ensuring an energy efficient, quietly comfortable home. Plus they’re virtually maintenance free, with no need to paint, stain or refinish.
   PVC is available on our Apex, Horizon and Terrain Series of windows.

2. ACRYLIC WRAP
   The perfect harmony of style and durability, high-performance acrylic-based wrap provides our customers with an array of exterior and interior colour options previously not possible for PVC windows.
   This beautiful and long-lasting alternative has been used in Europe for decades, and now All Weather Windows is proud to introduce this process to our customers in the Canadian marketplace.
   Acrylic wrapped PVC is available on our Apex Series of windows, along with the Ascent 6100 window.

3. METAL CLAD
   Create a statement by upgrading from PVC to our award winning Metal Clad PVC windows.
   With bold styling and a variety of exterior colour choices, these windows combine the strength and elegance of aluminum cladding with all the benefits of a fusion-welded PVC frame. The result is superior durability and energy efficiency. And just like our PVC windows, they’re virtually maintenance free.
   Metal Clad PVC is available on our Apex Alloy 9950 windows.
choose your colour

Who says windows have to be boring? Express yourself with bold, beautiful colour.

Forget about the old standard in home design. New home builds have beautiful touches that add character and individuality, and the interiors are just as carefully styled. There’s a demand for homes with curated style, character and colour—both inside and out.

PVC COLOURS
Alpine 6700, Ascent 6100, Terra 2700, and Terrano 2100 are available in white PVC only.

INTERIOR/EXTERIOR

 METAL CLAD EXTERIOR COLOURS

**WHAT IS ACRYLIC WRAP?**

**LASTING POWER**

Acrylic wrap is a high-performance acrylic-based product that is permanently bonded to the PVC window frame. It is weather and ultraviolet-resistant and retains its finish and colour throughout its service life. The wrap also features a contemporary stipple emboss finish that pairs well with modern home exteriors and interiors. Its low surface tension means that it can be wiped clean easily and it also resists chalking, cracking and fading—its durability is greatly superior to basic paint-covered window frames.

**THE APPLICATION PROCESS**

The wrap, once applied, bonds to the window profile with an immense strength that is fostered through our polyurethane reactive (PUR) hot melt process. The PUR reacts chemically when exposed to atmospheric moisture at the time of lamination, creating a cross link between profile and wrap that results in a strong, durable bond. This bond cannot be reactivated and will withstand the harshest conditions, from extreme heat to extreme cold.

---

*PVC components are white on all colours other than wicker. Not all interior colours are available with all exterior colours.
choose your operating style

When choosing windows, consider the energy efficiency of each window operating style, as well as the weather conditions in your city.

FIXED
A fixed window is a casement or awning window that doesn’t open.

PICTURE
Picture windows do not open. They offer a low-profile frame to maximize glass surface, allowing a beautifully clear, unobstructed view.

CASEMENT
Hinged on the side, casement windows swing outward like a door, providing excellent air circulation into your home. They are also one of the most energy efficient operating windows because of their tight seal when closed.

AWNING
Like a casement window, an awning window is hung horizontally. Hinged on top, it swings outward, shielding from the rain while providing good ventilation and constant airflow. Like the casement window, it is also one of the most energy efficient operating windows.

BAY & BOW
Bay and bow windows allow you to expand an area in your home. Made up of a combination of windows attached at an angle, these windows extend beyond the wall, opening up any room.

SINGLE HUNG
With a bottom sash that slides up, the single hung window allows controlled airflow into your home.

SLIDER
The slider window has one or more sashes that slides open horizontally.
choose your configuration

From urban geometric shapes to rustic ski chalet angles, the possibilities are endless.

If you’re considering something more distinctive, All Weather Windows can help you create a unique combination of windows to suit both your personality and your home.
choose your glass

Good design and correct installation are important factors in ensuring energy efficient windows, but glass performance plays the biggest role.

All Weather Windows offers a variety of energy-efficient glass options and technologies to ensure maximum comfort in any climate. With dual and triple pane configurations and multiple Low-E coating options, our glass keeps the summer heat out and the winter heat in.

SUN OR SHADE?

If you prefer to take advantage of the sun’s heat from your south and west-facing windows, consider glass with a higher solar heat gain (SHGC). Alternatively, choosing glass with a lower SHGC will keep the sun’s heat out, leaving your home cool and comfortable, reducing cooling costs.

</table>

**R-Value:** A measurement of the resistance of heat transfer through glass. The higher the R-Value, the better the window insulates against heat.

**Solar Heat Gain (SHGC):** The amount of the sun’s heat that transfers through glass from the exterior to the interior side. The higher the solar heat gain, the more a window allows heat to pass through into a home.

**U-Value:** A measure of the rate of nonsolar heat flow through a material or assembly. The lower the U-Value, the greater a window’s resistance to heat flow and the better its insulating value.

PRO TIP: SAVE ON YOUR ENERGY BILL

Installing energy-efficient windows can reduce your energy costs by up to 16%.
OUR GLASS TECHNOLOGY

A lot goes into making your windows as energy-efficient as possible, and it all starts with the glass. With over four decades of experience, we’re experts in high-performance, energy-efficient glass. Discover the technology we use to maximize comfort and energy savings.

DUAL PANE
Built with two panes of glass. Air between the panes acts as an insulation barrier, making your windows more energy efficient.

TRIPLE PANE
Built with three panes of glass, triple pane units provide better insulation value compared to dual pane. This helps lower heating costs, virtually eliminates condensation and also acts as an excellent sound barrier.

ARGON GAS
Argon gas is an inert, non-toxic, clear and odourless. Used to fill the space between panes of glass, argon gas minimizes convective currents that occur between glass panes. This reduces the tendency for glass to collect frost on cold winter days and improves the insulation quality of your windows.

SYSTEM V (LOW-E 189)
System V glass delivers thermal performance similar to triple pane but only uses two panes of glass. Low-E coatings are applied to two of the four glass surfaces of the sealed unit, resulting in increased thermal performance.

LOW-E (LOW-E 180)
Low-E 180 is a single coating applied to the surface of the glass and reduces heat loss by reflecting furnace heat back into a room. It also allows a large percentage of outside solar energy to pass through the glass into your home. This coating is most beneficial in the winter, since the heat provided by the sun can reduce the demands on your furnace. When combined with dual or triple pane glass, Low-E can offer between 35%-105% better insulating values than non Low-E glass. No other coating has a greater impact on reducing heating bills and improving the overall comfort of a home.

SUNSTOP (LOW-E 270)
SunStop uses two layers of Low-E coating over top one another to block out the sun’s heat, light and UV rays. Perfect for south and west facing windows, this coating keeps your home cool and comfortable in the summer to help reduce air conditioning costs. SunStop also improves the insulation properties of glass to help keep your home warmer in the winter when compared to clear glass.
choose your options

What would personalization be without options? Choose from brickmoulds, textured glass, grilles and hardware. Be bold or subtle—the choice is yours.

BRICKMOULD

Enhance your home’s curb appeal by adding exterior brickmould. Brickmould is attached to the outside exterior of your window and fills the gap between the window frame and your home’s exterior finish. Brickmould is offered in all exterior acrylic wrap colours, in addition to white and wicker. It is available in the following 3 styles:

- 1 1/2” Renovation
- 2” Renovation
- 2” Back Set
- 1 1/2” New Construction (white only)

HARDWARE

Truly stand out with a selection of beautiful colours and finishes.

WINDOW HARDWARE

Our Encore series of hardware features a sleek, contemporary design. The discreet folding profile handle provides a clean look and rescues interference with curtains and blinds. Best of all, Encore comes standard on all casement and awning windows.

![Encore series of hardware](image)

Note: Actual finishes may not be exactly as shown. Colour selection varies by series. Ask an All Weather Windows representative for details.

PATIO DOOR HARDWARE

Our premier handle set is designed to accent larger patio doors with an elegant and easy-to-grasp shape that comes with double and true triple multipoint lock options. We also offer contemporary handle options for those wanting a sleek, modern style.

![Patio door hardware](image)

Note: Allure is only available in white & wicker. Signature is not available in white or wicker.
TEXTURED GLASS

Whether it’s for increased privacy or a splash of personality, we offer several textured glass options for any style.

INTERNAL GRILLES & SIMULATED DIVIDED LITES (SDL)

SIMULATED DIVIDED LITES (SDL)

Simulated Divided Lites (SDL) are installed on the exterior of the glass surface to simulate the look of divided panes of glass.

INTERNAL GRILLES

Internal Grilles are installed between panes of glass, leaving the exposed interior and exterior glass surfaces smooth and easy to clean.

SDL & INTERNAL GRILLE PATTERNS

GRILLE FINISHES

* Lead available on 5/16” and 5/8” Georgian grilles only

APEX ALLOY 9950 | SUMMIT 9700 | APEX 9100
PART OF OUR APEX WINDOW SERIES

apex alloy

9950

KEY FEATURES

» Innovative V-weld technology
» Aluminum exterior colour options
» Interior acrylic wrap colour options
» Durable spring-loaded screen
» Multi-point casement lock system

- Optional triple pane glazing
- Automotive-grade weather stripping for a superior seal in all conditions
- Optional interior acrylic wrap finishes
- Fusion-welded 3 5/8" multi-chamber frame for improved energy performance
- Optional 2" integrated brickmould
For a stunning home design—on the inside and out—our metal clad PVC windows offer elegance, strength and durability.

Not only do our Apex Alloy 9950 windows eliminate all water and air leaks through the revolutionary V-weld technology, but they also come with a variety of bold exterior colour options and two stylish acrylic wrap interior colours for the ultimate in custom window styles.

Our 9950 windows are instantly noticeable with their sleek, elegant exterior, but they also offer benefits such as excellent energy efficiency and a virtually maintenance-free frame. Experience window luxury at its finest with the Apex Alloy 9950 series.

**OPERATING STYLES**
Apex Alloy 9950 is a casement series window and is available in several operating and non-operating styles.

**SDL & INTERNAL GRILLE**
Accent your style with interior grilles or exterior simulated divided lites (SDL). See page 21 for available styles.

**GLASS**
Apex Alloy 9950 offers optional triple pane glass for increased performance. See page 18 for available options.

**HARDWARE**
Featuring Encore folding hardware for a clean & contemporary design. See page 20 for details and available finishes.

**BRICKMOULD**
Apex Alloy 9950 features an optional integrated 2” brickmould, allowing for a wider range of window applications.

**INTERIOR COLOUR**
Express yourself - both inside and out with our interior acrylic wrap. See page 15 for available options.

**EXTERIOR COLOUR**
Possibilities are endless with a wide selection of standard and premium finishes. See page 14 for available options.

ascent
6100

KEY FEATURES

» Black acrylic wrap exterior
» Triple and dual pane glazing options
» Interior glazing stops
» Triple weather stripping
» Clean, modern frame profile
High performance, modern styling and good value should never come at a compromise. That’s why we created Ascent.

Ascent is built for those who want energy efficiency, outstanding features and a trend-setting black exterior acrylic wrap. It offers multiple custom capabilities, including custom sizes, glass, brickmould, grille and SDL options. Together, these possibilities can help customers choose a design that complements any style, truly taking your home’s aesthetic to new heights.

**OPERATING STYLES**
Ascent 6100 is a casement series window and is available in several operating and non-operating styles.

**SDL & INTERNAL GRILLE**
Accent your style with interior grilles or exterior simulated divided lites (SDL). See page 21 for available styles.

**GLASS**
Ascent 6100 offers optional triple pane glass for increased performance. See page 18 for available styles.

**HARDWARE**
Featuring white Encore folding hardware for a clean & contemporary design.

**BLACK EXTERIOR COLOUR**
Ascent 6100 is available with an acrylic wrapped exterior in black, complemented by a white PVC interior.
You’re standing on solid ground. At the base of the summit. It’s a starting point, but quality is not forgone. You are in the presence of greatness.

TERRA 2700 | TERRANO 2100
PART OF OUR TERRAIN WINDOW SERIES

terra 2700

discover our windows: basement series

Whether you are looking to bring fresh air into your recreation room, need pass-through space for large objects, or to meet fire escape codes for basement bedrooms, we have the window that’s right for you.

HOPPER 2200 | DOUBLE SLIDER 5600
basement

2200 & 5600

KEY FEATURES

» Energy efficient
» Superior airflow control
» Removable screen & sashes
» Great water & air management
» Durable & affordable

Removable sashes and screens designed to meet fire escape codes for basement bedrooms

High quality, maintenance free PVC frame with integrated nail flange

Optional triple pane glazing (5600 hopper only)
All Weather Windows offers a variety of options ideal for basement applications that are secure, energy efficient and designed to meet your needs.

The Hopper style basement window opens to a complete net clear opening, allowing you the flexibility to bring building materials (such as drywall) into the basement, and meets fire escape egress codes with smaller sized units.

The Double Slider has two operational sides, sliding from side to side. You can easily remove both sashes for cleaning and create a larger net clear opening if you need to bring building materials into the home.

OPERATING STYLES
Our Basement Series windows are available in both a double slider or a top hinge awning (hopper) configuration.

INTERNAL GRILLE
Customize your glass with interior grilles for a truly customized look. See page 21 for available styles.

GLASS
5600 double sliders and 2200 hoppers both come standard with dual pane glass while 5600 series double sliders are available with optional triple pane glass. See page 18 for available options.
discover the view with our patio doors

Maximize your view of the outdoors with maximum glass area while enjoying all the benefits of low maintenance, high-performance PVC with our line of sliding patio doors.

ATMOSPHERE | VANTAGE | VISCOUNT
atmosphere
folding door

KEY FEATURES

» Heavy-duty metal reinforced PVC frame
» 3-point locking hardware
» Exterior/interior painted colour options
» Dual and triple pane glazing
» Extensive configuration options

Slimline frame design for maximum viewing space
Innovative 3-point locking hardware with independent locking system on every other panel
Optional retractable screen
Configurations from 2 to 8 panels wide
Maximize your living space with the ATMOSPHERE folding door - the perfect space solution!

The ATMOSPHERE Folding Door offers an innovative and high-performance door solution for residential and commercial applications. The slim design allows maximum viewing from all angles, when fully retracted it provides easy access to the outdoors and a feeling of wide-open space.

The ATMOSPHERE Folding Door frame is assembled mechanically with metal reinforcements for maximum sturdiness. To ensure long lasting quality, the sashes are welded and have metal reinforcements in all vertical stiles and horizontal rails. The all-exposed aluminum head and sill tracks are anodized to prevent corrosion, making this folding door virtually maintenance-free.

**CONFIGURATIONS**
ATMOSPHERE folding doors are available from 2 panels, all the way up to an impressive 8 panels wide, all with several operating styles.

| 2 Wide | 3, 4, 5, 6, 7 Wide | Up To 8 Wide |

**PVC COLOURS**
ATMOSPHERE folding doors are available in 2 PVC extrusion colours: white and blue white.

- **White**
- **Blue White**

**HARDWARE**
Hinged hardware (hinges, wall pivot block, half offset hinges) is offered in oil rubbed bronze finish to match the handles.

- **White**
- **Black**
- **Brushed Chrome**
- **Polished Chrome**

**PAINTED COLOURS**
In addition to 6 standard interior & exterior painted colour options, custom colors are also available.

- **Anthracite Grey**
- **Architectural Brown**
- **Black**
- **Chocolate Brown**
- **Clear Anodized**
- **Pebble**

**INTERNAL GRILLE**
Accent your style with interior grilles. See website below for all available patterns and finishes.

**GLASS**
ATMOSPHERE offers optional triple pane glass for increased performance. See website below for all options.

Bring the beauty of the outdoors inside with the Vantage patio door. Best of all, Vantage is available with exterior and interior acrylic wrap.

Created to help homeowners enjoy a clear, unobstructed view of their backyard, Vantage really is the whole package. With superior energy efficiency, multiple customizations, and a variety of exterior colour options, the Vantage is an excellent option for those seeking a stylish, high-performing patio door.

As part of a more energy efficient home package, the Vantage patio door is offered with the option to upgrade to triple pane glass. Triple pane glass prevents heat loss and provides superior soundproofing to keep a home peaceful and warm year round. Vantage also comes with a true fixed sash for an innovative, balanced appearance.

**CONFIGURATIONS**
Vantage patio doors are available in 2, 3 & 4 wide configurations with your choice of sash operating direction as well as a double opening option*.

**SDL & INTERNAL GRILLE**
Accent your style with interior grilles or exterior simulated divided lites (SDL). See page 21 for available styles.

**GLASS**
Vantage offers optional triple pane glass for increased performance. See page 18 for available options.

**HARDWARE**
Customize your patio door with one of 3 sleek, modern designs available in 6 elegant finishes. See page 20.

**INTERNAL BLINDS**
Add extra privacy to any home with cordless, maintenance free internal blinds. Available in white and slate grey.

**INTERIOR COLOUR**
Express yourself - both inside and out with black interior acrylic wrap.

**BRICKMOULD**
Vantage offers brickmould options for renovations and new construction. See page 20 for details and options.
viscount  
patio door

KEY FEATURES

discover our exterior doors

Front doors are a statement of style and reflect your unique personality. A bold and beautiful door will transform the look of your home and impact the mood and attitude of the entire space.
first impressions matter

Beyond functionality, the type of door you choose can say a lot about who you are. Welcoming. Bold. Charming. These are just a few of the words that come to mind when thinking about the connection between door and homeowner.

All Weather Windows offers an extensive selection of exterior doors. From classic elegance to modern and contemporary styles, the possibilities are endless. Explore and choose from our authentic, high-quality and affordable exterior doors to make a lasting impression.

BARRINGTON®
The ultimate in luxury and authentic wood design, Barrington® fibreglass doors boast exquisite carpenter detail and leading-edge construction. Featuring variable depth, realistic woodgrain that finishes easily and beautifully.

CONTEMPORARY CHERRY
Simple and pure in design, our contemporary cherry collection achieves bold design through stainless steel embellishments or simple grooved lines. Made with high-quality cherry grain textured fibreglass, this door adds warmth and texture to any entry way.

VISTAGRANDE™
Instantly brighten any space with VistaGrande™ flush-glazed doors. Available in a number of glass options, VistaGrande™ doors offer a wider viewing area and cleaner appearance over traditional glass inserts.

Note: All doors in this catalogue come unstained/unpainted unless otherwise noted. Photos shown are for illustration purposes only.

TEXTURED WOODGRAIN FIBREGLASS

Featuring textured premium woodgrain fibreglass in three grain types, our doors include distinct architectural details, a reinforced lock area and thousands of customizable glass and panel combinations to choose from.

- Make a bold statement with variable-depth woodgrain patterns.
- Detailed and well-defined panel profile adds architectural appeal.

SMOOTH FIBREGLASS

Smooth fibreglass doors combine the elegance of wood with the low-maintenance of fibreglass. They feature high-definition panel profiles that add architectural interest and elegance. The smooth surface is paintable and will not rust or dent.

- Smooth fibreglass surface is ideal for painting and will not rust or dent.
- From decorative glass to grilles and panels, the hardest part is deciding.

PREFINISHED STEEL

Our steel doors feature high-definition decorative panels that closely replicate those of traditional hand-crafted doors. Steel doors are also the ultimate choice for security. Best of all, they boast a durable and convenient prefinished white or black surface.

- High-quality factory applied white or black painted surface.**
- High-quality composite bottom rail and wood-edge construction resists rot and corrosion.

**Door lite frames do not come prefinished and need to be painted to match the door. Black prefinished doors come with a black exterior only and are not available with door glass. The interior surface is prefinished in white only.
your
notes
your notes
BRICKMOULD
Brickmould is attached to the window or door frame on the exterior of a home. It covers the gap between your home’s exterior and the window or door frame.

CLADDING
Metal sheathing moulded and adhered to the outdoor sections of a window frame.

DRIP LIP
An extruding edge that channels water away from the window and helps prevent it from dripping onto the wall under the window.

ENERGY STAR® CERTIFIED
ENERGY STAR® is a third party assessment of the energy efficiency of products. All Weather Windows proudly manufactures ENERGY STAR® certified products including many that qualify for the “Most Efficient” program.

ENERGY RATING (ER RATING)
An ER-rating is derived from solar heat gain, heat loss through frames, centre and edge of glass, and air leakage heat loss. The combined effect is measured in number of watts per square metre and is either positive or negative. A positive number represents a net heat gain and helps in reducing the home’s heating costs. A negative number indicates that the product loses more energy through heat loss and air infiltration than it gains in solar energy absorbed from the sun (i.e. the home’s heating system has to work harder in colder weather).

FRAME
Outside part of a window consisting of jambs and sills that encloses a window sash.

GRILLE
Cross-bars in between the panes of glass to give the impression the window is divided into a number of smaller panes.

INTERIOR CASING
Trim or frame around the window on the interior.

INTERIOR GRILLES
Decorative bars that are placed between the panes of glass.

JAMB
Jambs are located inside the framing of a window, along the top and sides for structural support. Inferior jambs can be a weak point in a window, allowing for leaks or security concerns. Interior jambs can be a weak point in a window, allowing for leaks or security concerns.

MULLION
A mullion is the vertical piece that connects side-by-side units of a window.

PASSIVE SOLAR HEAT GAIN
Solar heat that passes through a material and is captured naturally, not by mechanical means.

RAIL
The horizontal part of a window sash on single-hung and double-hung windows.

RELATIVE HEAT GAIN
A calculated relationship of heat gain (through a window system) that accounts for centre-of-glass U-Value and centre-of glass shading coefficient based on a standard inside and outside temperature.

SASH
The sash is the part of the window holding the glass in place when the window is being opened. They are available in sliding or hinged models, and create a tight seal with the frame when the window is closed.

SHADING COEFFICIENT
A glass measurement comparing solar heat transmission, related to 1/8 inch clear glass.

SILL
The flat bottom part of a window or door frame.

SIMULATED DIVIDED LITES (SDL)
Decorative bars that are placed on the exterior of the glass. This gives the look of divided glass without compromising performance and energy efficiency.

SPACER
Spacers are around the perimeter of the sealed glazing unit to provide uniform separation between the panes of glass in multi-paned windows. They absorb moisture from the trapped air in the space between the glass, preventing fogging and condensation.

STILES
The vertical parts of a window sash (connected to rails, the horizontal parts).

TRANSOM WINDOW
A window installed above a door, separated by a crosspiece.

U-VALUE
A measure of the rate of non-solar heat flow through a material or assembly. The lower the U-Value, the greater a window’s resistance to heat flow and the better its insulating value.

VISIBLE LIGHT TRANSMITTANCE
The percentage or fraction of the visible light spectrum that is transmitted through the glass of a window or skylight as reduced by the sash material and reluctance of the glass.

WEATHER STRIPPING
Weatherstripping is the component of a window that provides a seal between the frame and the sash. It is used to prevent air leakage. The better the weather stripping, the better the window performance.
We manufacture a full line of quality windows and entry doors. Homeowners, contractors, dealers and builders rely on us for a comprehensive line of durable products that add value and beauty to any home. Let us be your first choice for all your window and door needs.
